

MENOPAUSAL FORMULATION

Menopausal symptoms are caused by hormonal imbalances brought on by a decrease in both estrogen and progesterone production. This formulation offers a unique blend of herbal extracts that naturally re-establish healthy estrogen and progesterone levels, thus providing you with naturally balanced estrogen and progesterone levels as you enter menopause.

Dong Quai Root Extract

Dong Quai is an excellent source of plant estrogen. Dong Quai effectively addresses many symptoms associated with menopause; especially hot flashes, painful menstruation, lack of menstruation and/or too frequent menstruation.

Chaste Tree Berry

The Chaste Tree Berry is an excellent source of natural progesterone. It is a well-known herbal remedy for PMS, endometriosis, uterine fibroids, ovarian cysts, fibro-cystic breasts and irregular peri-menopausal bleeding.

Dandelion Root Extract

Dandelion Root Extract has been proven to gently detoxify the body and support liver function, thus supporting re-established hormonal levels.

Black Cohosh Root Extract

A excellent source of plant estrogen. Black Cohosh is the most clinically researched herb in the treatment of symptoms associated with menopause and as a alternative for standard hormone replacement therapy. Black Cohosh is effective in the treatment of menopausal hot flashes, profuse perspiration, headaches, heart palpitations, depression, PMS, painful menstruation, sleep disturbances, vaginal atrophy, vaginal dryness, nervousness, irritability and a loss of concentration.
