

STOP-SMOKING FORMULATION

You know the benefits of no longer smoking. You may have even tried quitting before, but regardless you are now ready to put an end to one of the most dangerous habits that humans can entertain. If there are any mental and/or emotional issues that might be attributing to your need to continue smoking (ex. if smoking calms your nerves), these issues are then best addressed through proper consultation. In addition to addressing any contributing factors, this supplement in a physical way can help you as well reach your smoke-free destination!

Managing The Tobacco Cravings...

Quitting the “habit” isn’t easy and it doesn’t happen all at once. Your chances of quitting for good can increase though if you view quitting as a journey or as a process rather than seeing it as a challenge or an uncomfortable change in your personal life that you must endure.

This formulation is an effective combination of certified organic botanical extracts that help you manage the tobacco cravings, as well as reduce the tension associated with the smoking cessation. It also facilitates the release of accumulated toxins in your body and promotes a general calming.

The Choice Is Yours...

This preparation will make the taste of smoking both unbearable and nauseating. At some point, you will have to choose whether you prefer to continue smoking or remain on the formula, because you won’t be able to do both!

Active Ingredients:

Lobelia...

Lobelia can mimic nicotine such that your body thinks it’s still getting nicotine, but its not! Lobelia contains an active ingredient called *Isolobeline*; a compound so similar to nicotine that your body is tricked into thinking it’s still enjoying nicotine. Lobelia contains many cleansing agents that will help rid the body of the toxic build-up associated with smoking. Lobelia is also a natural expectorant and is known to reduce food cravings often associated with quitting smoking.

Plantain...

Plantain is derived from the dried leaves of a plant called Plantago Major. Plantain is known to cause both aversions to tobacco and related nausea with continual exposure to nicotine. Like Lobelia, Plantain is also a natural expectorant.

Cleansing Herbs...

This mixture contains Alfalfa, which is known to help both oxygenate the blood and detoxify the body. Alfalfa is also an antifungal agent.

Once you have finally quit, the effects are dramatic and immediate. After the first day, oxygen and carbon monoxide levels begin to return to normal. After two days, your taste buds begin to rejuvenate and your sense of smell and taste are revived. After two weeks, breathing and cardio-vascular circulation will improve dramatically.

NOW... IT’S TIME TO GET STARTED!
